

Sebastian Striebig

Interim Product & Process | Taskforce for Delivery & Team Performance

Results I Deliver:

Less firefighting – Stable systems, no weekend crisis management

Predictable delivery – Reliable teams, realistic commitments

No money wasted on low-value work – Only features customers truly need

Faster time-to-market – From idea to production in weeks

Transparency instead of guesswork – Clear metrics, no surprises

Fewer escalations – Teams solve problems independently

Lower attrition – Developers work productively

Scalable outcomes – More output without adding headcount

Sebastian Striebig

Interim Product & Process
Delivery & Teamperformance

Core Topics & Engagement Areas

Product Discovery

- Identify the real problem
- Hypothesis-driven validation
- Build only what customers truly need

Delivery Excellence

- DevOps culture & DORA metrics
- Predictable releases, CI/CD
- Shorter time-to-market

Knowledge Flow & Transparency

- Break down silos
- Clear metrics instead of gut feeling
- Visibility for all stakeholders

Building Team Autonomy

- Teams solve problems themselves
- Fewer escalations to management
- Rebuild trust
- Hands-on coaching in day-to-day work

How I Work

- Inside the team, not next to it
- I show how it works – until it sticks
- Establish a continuous improvement process
- Then I make myself unnecessary

Interim & Turnaround

- Rapid entry into critical situations
- Stabilizing dysfunctional teams
- Handover to internal successors

Interim Product & Process
Delivery & Teamperformance

Selected Engagements

Automotive OEM (6 months)

- Ticket system for 800 users
- 70% faster processing
- AI duplicate detection (95% accuracy)

SaaS Data Platform (9 months)

- Discovery framework for 7 Product Owners
- 80% faster data processing

Industrial SaaS (43 months)

- 5,000 users across 5 continents
- MTTR: 3 days → 2 hours
- Team size: 8 → 4 with same quality

Mechanical Engineering (9 months)

- Eliminated 8-month backlog
- Rebuilt the team structure
- MVP launched

Automotive Tier 1 (5 months)

- Offshore utilization: 45% → 95%
- Team scaling: 2 → 8 developers

Software Quality (24 months)

- 53 pilot projects across EMEA / Asia / USA
- Engineering intelligence for C-level
